(54) TONER SUPPLY CONTAINER

(57)Abstract:

PURPOSE: To obtain a toner supply container from which the toner can be fed smoothly into a developing machine even in the case toner is fed with a toner supply opening of the container held in close contact with a toner receiving opening of the developing machine.

CONSTITUTION: The container 1 is provided with a supply opening 2 at its closed part 1b. An air pipe 3 is insertable freely slidably into the container through a hole 41 of the closed part 1b. The end of the air pipe 3 is projected from the hole 41 by the resilient force of a coil spring 5. A cap 4 is fitted into a cylindrical part 4b in a manner to permit its free rotation and prevent its easy detachment therefrom. The cap 4 is provided with a semicircular notch 4a formed in its closing plate 4c.
